INCIDENT IR-27 • INITIAL ISSUE

Security incident report

Initial investigation record for the most recent security incident. The report captures facts known during the first response window and identifies fields subject to later committee review.

1. Incident overview

Incident identifier	IR-27	Most recent incident at close
Incident date	2025-09-27	Detection window began 00:08 UTC
Initial severity	Critical	Preliminary; committee may revise
Primary systems	Ledger Vault / Cargo Control	Access and movement records affected
Response lead	Caro Jinn	Security lead under charter
Containment status	Contained	Credential revocation completed 09:19 UTC

Initial findings

- Two badges were confirmed compromised in the first response window: B-104 and B-109.
- The access export independently records B-109 and B-112 as alerted badges.
- B-109 therefore appears across more than one incident source and requires reconciliation by unique identifier.
- No evidence indicates that ordinary daytime access records were part of the compromise.

AUTHORITY

The later Risk Committee update is authoritative for final severity. This report remains authoritative for its detailed badge and loss records.

Timeline and credential analysis

The sequence below combines detection, containment, and evidence-preservation events. Times are in UTC.

2. Response timeline

2025-09-26 21:14	Denied out-of-hours attempt	Ledger Vault	Escalated
2025-09-26 21:17	Second denied attempt	Ledger Vault	Correlated
2025-09-27 00:08	Unmanaged console session	Cargo Control	Alert confirmed
2025-09-27 00:26	Badge B-104 linked by camera review	Bay D	Compromise confirmed
2025-09-27 01:05	Badge B-109 linked to vault attempt	Ledger Vault	Compromise confirmed
2025-09-27 07:58	Incident response team assembled	Cargo Control	Containment begun
2025-09-27 09:16	Badge B-109 revoked	Identity service	Contained
2025-09-27 09:19	Badge B-112 revoked	Identity service	Contained
2025-09-27 12:40	Logs sealed for audit	Records store	Evidence preserved

Credential evidence

B-104	Incident report	Confirmed compromise
B-109	Incident report + access export	Repeated across sources
B-112	Access export	Alerted and revoked

Loss and exposure assessment

Initial direct impacts are shown separately from later forensic and committee adjustments to prevent double counting.

3. Direct incident impact

Unauthorized processing review	18,000	Estimated	Included in initial exposure
Containment services	12,000	Incurred	Included in initial exposure
Credential replacement	6,000	Incurred	Included in initial exposure
Cargo loss provision	15,000	Estimated	Included in initial exposure
Initial financial exposure	51,000	Initial total	Sum of components above
Cargo losses linked to IR-27	7 crates	Confirmed	Separate from operational handling losses

Follow-up handling

• The initial exposure does not include later forensic work approved by the Risk Committee.

• The operations brief records four additional handling losses outside IR-27; combine the two sources for the quarter total.

• The insurance deductible in the original policy schedule was amended before the incident date.

• The committee may revise severity without altering the incident date, badge evidence, or direct cargo count.

RECONCILIATION RULE

Add the committee's follow-up exposure to the 51,000 initial exposure. Do not replace or count the initial amount twice.
